Quick facts

Management Company:	FIL Investment Management (Luxembourg) S.à r.l.		
Investment Manager:	FIL Fund Management Limited (Bermuda, internal delegation)		
Sub-investment manager(s):	Internal and/or external sub-delegation to one or more Sub-investment managers as described in “The Sub-investment managers” section under “Management and Governance” of the Prospectus (~Note) ~ Note: The list of all Sub-investment managers having managed all or part of the assets of each fund over the last six or twelve months will be published in the annual and semi-annual financial reports.		
Depository:	Brown Brothers Harriman (Luxembourg) S.C.A.		
Ongoing charges over a year[^]:	Class A-USD:	1.79%	Class Y-ACC-USD: 1.09%
[^] Unless otherwise stated, the ongoing charges figure represents the ongoing expenses based on the annual financial report for the year ended 30 April 2025. This figure may vary from year to year.			
Dealing frequency:	Daily		
Base currency:	EUR		
Dividend policy*:	<u>Class A</u> Subject to the Board’s discretion, dividends are declared annually, normally on the first business day of August. The Board expects to recommend distribution of substantially all of the net income of the share class. <u>Class Y– ACC</u> No dividends will be paid for accumulating shares. The shares accumulate all interest and other income earned. * Unless otherwise stated, dividends will not be paid out of capital and/or effectively out of capital.		
Financial year end of this fund:	30 April		
Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is a Multi Asset fund and aims to achieve capital growth over the long term.
- The fund invests in a range of asset classes, including debt securities, equities, real estate, infrastructure, commodities and cash from anywhere in the world, including emerging markets.
- The fund may invest in the following assets according to the percentages indicated:
 - debt securities of any type: up to 60%
 - below investment grade* debt securities: up to 50%
 - emerging market debt securities and equities: up to 30%
 - equities: up to 90%
 - government debt securities: up to 60%
 - China A and B shares and listed onshore bonds (directly and/or indirectly): less than 20% (in aggregate)
 - REITS: up to 20%
 - China offshore bonds (including dim sum bonds (i.e. bonds issued outside of Mainland China but denominated in RMB)): less than 10%
 - equity-linked securities: up to 10%
 - eligible commodity exposure: up to 20%
 - hybrids (which are subordinated instruments that have more equity-like features) and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
 - money market instruments: up to 25%.
 - collateralised and securitised debt instruments: up to 20%
- In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to dynamically allocate investments across asset classes and geographic areas. The Investment Manager will allocate investments across asset classes and geographic areas based on their potential to generate capital growth or reduce overall risk. The fund adopts a multi asset approach which affords significant potential for diversification. To achieve its objective the fund adopts a tactical asset allocation strategy where the fund's investments may be actively balanced and adjusted. As part of the fundamental company analysis, the Investment Manager considers various factors, including growth and valuation metrics, company financials, return on capital, cash flows, company management, industry, and economic conditions.
- The Investment Manager considers environmental, social and governance (ESG) characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.
- A minimum of 70% of the fund's assets will comprise:
 - Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
 - Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet the ESG Tilt or ESG Target criteria as set out in the Prospectus;
 - Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; or
 - Sovereign issuers that have been subject to negative screening by the Investment Manager.
- The fund may directly invest in China A Shares and/or onshore China debt securities listed or traded on any regulated market in China through the Qualified Foreign Investor ("QFI") status of FIL Investment Management (Hong Kong) Limited, the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect (collectively, "Stock Connect"), the China Interbank Bond Market ("CIBM") scheme and/or bond connect between Hong Kong and China ("Bond Connect") and/or via any other permissible means available to the fund under prevailing laws and regulations or indirectly by way of access to products or funds investing in China A Shares and/or debt securities listed or traded on any regulated market in China. "Regulated market in China" refers to the Shanghai Stock Exchange, the Shenzhen Stock Exchange or the mainland China interbank bond market, as the case may be. The fund may also have indirect exposures through financial instruments that invest in or are linked to the performance of China A Shares, e.g. via equity-linked notes and onshore China debt securities, e.g. via credit-linked notes.
- The fund may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, CoCos, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime for financial institution, in compliance with its investment policy and limits. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). In compliance with the requirements and guidance issued by the SFC, such investment will at all times remain below 50% of the fund's net asset value. For the avoidance of doubt, less than 30% of the fund's net asset value may be invested in each individual type of instruments with loss-absorption features as described above.

* Below investment grade securities shall mean securities with a rating of BB+ or less from Standard & Poor's or equivalent rating from an internationally recognised rating agency (in case of divergent ratings, the worst of the best two credit ratings applies).

- The fund's source of income will mainly be generated from dividend payments (from equity securities) and coupon payments (from bond holdings) based on their potential to generate income and capital growth.
- The dividend or payout policy of the underlying closed-ended REITs is not representative of the dividend or payout policy of this fund.
- The fund may use derivatives for hedging, efficient portfolio management and investment purposes.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

Use of derivatives/investment in derivatives

The fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong offering documents for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Risk relating to dynamic asset allocation strategy

- The investments of the fund may be periodically rebalanced and therefore the fund may incur greater transaction costs than a fund with static allocation strategy.

Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Asset Allocation Risk

- The fund is subject to the risks of all asset classes included in its asset allocation. To the extent that patterns of correlation or non-correlation among asset classes do not behave as expected, the fund may experience greater volatility or losses than it otherwise would have.

Risks associated with Debt Securities

- Credit / Counterparty risk (see "Credit / Counterparty Risk" below)
- Interest Rate Risk (see "Interest Rate Risk" below)
- Downgrading Risk (see "Downgrading Risk" below)
- Valuation Risk (see "Valuation Risk" below)
- Credit Rating Risk (see "Credit Rating Risk" below)

Interest Rate Risk

- Investment in the fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.

Risk associated with Debt Securities Rated Below Investment Grade/Unrated Securities and High Yielding Debt Instruments

- The fund may invest in debt securities rated below investment grade or unrated securities. Such securities are generally subject to lower liquidity, higher volatility, heightened risk of default and loss of principal and interest than higher-rated/lower yielding debt securities.

Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

Credit / Counterparty Risk

- The fund is exposed to the credit/default risk of issuers of the debt securities that the fund may invest in.

Sovereign Debt Risk

- The fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the fund to participate in restructuring such debts. The fund may suffer significant losses when there is a default of sovereign debt issuers.

Credit rating risk

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

Income-producing securities

- Although the fund will generally invest in income-producing securities, it is not guaranteed that all underlying investments will generate income. To the extent that underlying investments of the fund are income producing, higher yields generally mean that there will be (a) reduced potential for capital appreciation for equity securities; and (b) increased potential for capital appreciation and/or depreciation for fixed income securities.

Risk of investing in CoCos and other instruments with loss-absorption features

- The fund may invest in instruments with loss-absorption features. Those features have been designed to meet specific regulatory requirements imposed on financial institutions and typically include terms and conditions specifying the instrument is subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of the following: (a) when a financial institution is near or at the point of non-viability; or (b) when the capital ratio of a financial institution falls to a specified level.
- Debt instruments with loss-absorption features are subject to greater capital risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (such as those disclosed above). Such trigger events are likely to be outside of the issuer's control and are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer (potentially at a discounted price) or have their principal written down (including permanently written down to zero) upon the occurrence of certain 'triggers'. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The fund may also invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss principal invested.

Emerging Market Risk

- The fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.

Eurozone Risk

- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the fund.

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Sustainable Investing

- To the extent the fund weighs ESG or sustainability criteria in choosing investments, it may underperform the market or other funds that invest in similar assets but do not apply sustainability criteria. Sustainable characteristics used in the fund's investment policy may result in the fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might be disadvantaged to do so. As such, the application of ESG criteria may restrict the ability of the fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the fund.
- The ESG characteristics of securities may change over time, which may in some cases require the Investment Manager disposing of such securities when it might be disadvantageous to do so from a financial perspective only. This may lead to a fall in the value of the fund.
- The use of ESG criteria may also result in the fund being concentrated in companies with ESG focus and its value may be volatile when compared to other funds having a more diversified portfolio of investments.
- There is a lack of standardised taxonomy of ESG evaluation methodology and the way in which different ESG funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds.

- While the fund, in selecting investments, may use a proprietary ESG scoring process that is based partially on third party data, such data may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.
- Evaluation of sustainable characteristics of the securities and selection of securities may involve the Investment Manager's subjective judgment. As a result, there is a risk that the relevant sustainable characteristics may not be applied correctly or that the fund could have indirect exposure to issuers who do not meet the relevant sustainable characteristics, and sustainable characteristics of a security can change over time.
- In making its proxy voting decisions consistent with ESG criteria, exclusionary criteria, the fund may not always be consistent with maximising an issuer's short-term performance.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2025 was achieved under circumstances that may no longer apply as the investment objective was changed in 2021 and 2025.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 2001
- Class A-USD launch date: 2001
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 5.25% of NAV Class Y – 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.25% p.a. of NAV Class Y – Up to 0.70% p.a. of NAV
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong offering documents. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong offering documents.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
