What is this product?

The China A Shares Equity Portfolio (the "Portfolio") is a portfolio of AB SICAV I (the "Fund"), an open-ended investment company with variable capital domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and Investment Strategy

Objectives

The Portfolio's investment objective is to increase the value of your investment over time through capital growth.

Strategy

In actively managing the Portfolio, the Investment Manager uses fundamental and quantitative research to select securities that appear to offer attractive shareholder returns (bottom-up approach).

Under normal market conditions, the Portfolio typically invests in equity securities of companies that are incorporated in China and are traded on the China A-shares market. These companies may be of any market capitalization and industry. The Portfolio's investments may include convertible securities, depositary receipts, real estate investment trusts (REITs) and exchange traded funds (ETFs).

The Portfolio will invest at least 70% of its net asset value in China A-shares through one or more capital markets regimes providing access to China, including the China Connect Scheme and the QFI scheme. Currently, it is intended that the Portfolio may invest via the QFI scheme and the China Connect Scheme for up to 100% of its net asset value.

The Portfolio may also invest up to 10% of its net asset value in China B-shares and below 10% of its net asset value in equity securities of Chinese companies traded in Hong Kong or other offshore markets. With respect to such equity securities that are not China A-shares, the Portfolio may obtain investment exposure by purchasing such securities directly or through financial derivative instruments or structured products (e.g. participatory notes, provided that the exposure to structured products shall be limited to 20% of its net asset value).

The Portfolio's expected exposure to onshore RMB is 100% of its net asset value.

The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes.

Under exceptional circumstances (e.g. market crash or major crisis), the Portfolio may be invested temporarily up to 100% of its net asset value in cash, cash equivalents (such as bank deposits, certificates of deposit, commercial paper and treasury bills) and high quality short-term securities for cash flow management. To the extent the Portfolio invests defensively, it may not be pursuing its objective.

Use of derivatives / investment in derivatives

The Portfolio's net derivative exposure may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The Portfolio's investment may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Equities Securities Risk

The Portfolio's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Risks Associated with the QFI Scheme / the China Connect Scheme

The relevant rules and regulations (including restrictions on investments, repatriation of principal and profits, taxation)

ALLIANCEBERNSTEIN®

in the PRC are subject to change which may have potential retrospective effect. Where a suspension or intervention in the trading through the program is effected, the Portfolio's ability to achieve its investment objective could be negatively affected.

The Portfolio may suffer substantial losses if the Portfolio ceases to be eligible for the relevant program as the Portfolio may be prohibited from trading of relevant securities and repatriation of the Portfolio's monies, or if any of the key operators (including the relevant custodian/brokers) is bankrupt/in default and/or is disqualified from performing its duties.

Where the program is subject to quota limitations, the Portfolio may not be able to make its intended investments if there is a change in quota or the quota is fully utilized.

4. Concentration Risk

The Portfolio's investments are concentrated in equity securities of companies incorporated in mainland China and that are traded on the China A-share equity markets. The value of the Portfolio may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market.

5. RMB Currency Risk

RMB is currently not freely convertible and is subject to exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

6. Emerging Markets Risk

The Portfolio will invest in Emerging Markets (i.e. any country not defined as "high income" by the World Bank, or as otherwise determined by the Investment Manager which includes the subcategory of frontier markets), which are subject to higher risks (for example, liquidity risk, currency risk, political risk, regulatory risk, economic risk, legal and taxation risk, settlement risk and custody risk) and higher volatility than developed markets. Fluctuations in currency exchange rates may negatively affect the value of an investment or reduce returns – these risks are magnified in Emerging Markets.

7. PRC Tax Risk

There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via the QFI scheme or China Connect Scheme or access products on the Portfolio's investments in the PRC. Any increased tax liabilities on the Portfolio may adversely affect the Portfolio's value.

Based on professional and independent tax advice, the Investment Manager will make provisions from the Portfolio for 10% withholding income tax with respect to dividends received from China A-shares via the QFI scheme or China Connect Scheme.

Any shortfall between the provision and the actual tax liabilities, which will be debited from the Portfolio's assets, will adversely affect the Portfolio's net asset value.

8. Smaller Capitalization Companies Risk

Small- and mid-cap stocks may have lower liquidity and their prices are more volatile to adverse economic developments than large-cap stocks—smaller companies generally face higher risks due to their limited product lines, markets and financial resources.

9. Risk in Investing in Financial Derivative Instruments

Risks in investing with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element / component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Portfolio. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Portfolio.

10. Risks Associated with Payment of Dividends out of Capital

The Board has the sole and absolute discretion to amend the dividend policy, subject to the SFC's prior approval (if required) and by giving no less than one month's prior notice to shareholders. Dividend yield is not indicative of return of the Portfolio. Dividends may be paid from capital or effectively out of the capital of the Portfolio at the discretion of the Board, which may amount to a partial return or withdrawal of an investor's original investment or from any capital gains attributable to that original investment, and result in an immediate decrease of the net asset value per Share. The

ALLIANCEBERNSTEIN®

distribution amount and net asset value of the currency hedged share classes may be adversely affected by differences in the interest rates of the reference currency of the currency hedged share classes and the Portfolio's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share classes.

How has the Portfolio performed?

The bar chart below shows the past performance of Class A CNH Shares, which has been designated as the representative share class by the Management Company as it is a focus share class made available to Hong Kong investors.

Portfolio launch year: 2018

Class A CNH Share launch year: 2018

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much Class A CNH Shares have increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in CNH including ongoing charges and excluding any subscription fee and redemption fee you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance.
- With effect from 4 May 2020, the benchmark of the Portfolio is MSCI China A Onshore Index CNH.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

(Different fee structures apply to different classes of shares. Investors should refer to the offering document of the Fund for details.)

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio:

Fee	What you pay
Subscription fee (Initial Sales Charge)	Classes A, AD and AX Shares (and corresponding H Shares): up to 5% of the purchase price Classes I and IX Shares (and corresponding H Shares): up to 1.50% of the purchase price Not applicable to other Share Classes

ALLIANCEBERNSTEIN®

Switching fee ⁺	Not Applicable
Redemption fee	Not Applicable

Administration fee payable to the Administrator	
Transfer Agent fee	
Performance fee	Not Applicable
Distribution fee	Not Applicable
Administration fee payable to the Management Company*	Class SX [#] Shares: the lesser of USD50,000 or 0.01% All Share Classes: 0.05%

*Percentage per annum of net asset value

[#] Class SX Shares are reserved for institutional investors.

Other fees

You may have to pay other fees when dealing in the shares of the Portfolio.

Additional Information

- You may generally buy and redeem shares at the Portfolio's next-determined net asset value plus any applicable charges after the Management Company receives your request in good order on or before 11:00 A.M. Central European Time on each Business Day (every day that the Hong Kong Stock Exchange and banks in Luxembourg, Shanghai and Shenzhen are open for business), such time being the order cut-off time. Investors should note that, for applications sent through a Hong Kong distributor, such distributor may have an earlier cut-off time.
- The net asset value of the Portfolio is calculated on each Business Day and will be available on the following website www.alliancebernstein.com.hk or alternatively, you may contact AllianceBernstein Hong Kong Limited (as the Hong Kong Representative of the Fund) at +852 2918 7888.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from www.alliancebernstein.com.hk.
- The compositions of the dividends (i.e., the relative amounts paid out of (i) net distributable income and (ii) capital) for the most recent 12 months can be obtained from the Investment Manager and the Hong Kong Representative on request. The compositions of the dividends will also be available at: www.alliancebernstein.com.hk.
