* The ongoing charges figure is based on the expenses for the period from 1 December 2024 to 30 November 2025 and may vary from year to year. The ongoing charges figures are annualised. This Product Key Facts statement is updated at least annually and the Management Company can be contacted for the most recent data on the ongoing charges figure.

What is this product?

Goldman Sachs All China Equity Portfolio (the "Portfolio"), a portfolio of Goldman Sachs Funds (the "Fund"), is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

Objectives

The Portfolio seeks long-term capital appreciation by investing primarily in equity securities of Chinese companies.

Strategy

The Portfolio will, under normal circumstances, invest at least two-thirds of its net assets in equity and/or equity related securities and Permitted Funds (as defined in the Fund's Prospectus) which provide exposure to companies that are domiciled in, or which derive the predominant proportion of their revenues or profits from China, including companies listed in Hong Kong.

Equity and equity related securities may include common stock, preferred stock, warrants and other rights to acquire stock, American depositary receipts ("ADRs"), European depositary receipts ("EDRs") and global depositary receipts ("GDRs").

The Portfolio may invest up to 100% of its net assets in PRC (meaning People's Republic of China with the exception of the Hong Kong S.A.R., Macau S.A.R. and Taiwan R.O.C.) equity securities directly (e.g., through the Stock Connect scheme ("Stock Connect") or the qualified foreign institutional investor program ("QFI Program")) or indirectly (e.g., through Access Products or Permitted Funds investing in China A-Shares). "Access Product" is a security (such as participatory-note, warrant, option, participating certificate) linked to A-Shares or portfolios of A-Shares which aim to synthetically replicate the economic benefit of the relevant A-Shares or portfolios of A-Shares. The Portfolio's direct investments in China A-Shares through the QFI Program will be less than 70% of its net asset value.

The Portfolio may invest up to one-third of its net assets in equity and/or equity related securities of other companies, non-equity related securities and Permitted Funds.

The Portfolio may invest up to 10% of its net assets in Permitted Funds to the extent that such investment is consistent with its investment policy and restrictions and may not invest in Permitted Funds that allow leverage, as this may result in losses exceeding the Net Asset Valuation (NAV) of the portfolio of the Permitted Fund.

The Portfolio may also use financial derivative instruments as part of its investment policy or for hedging purposes. These may include, but are not limited to, foreign currency forward contracts, futures and option contracts (on equity securities and markets) and swaps (including equity swaps and total return swaps).

In exceptional and temporary circumstances (including but not limited to, sharp downturn in financial markets, political or economic crisis), the Portfolio may hold up to 100% in liquid assets (including but not limited to, deposits and Money Market Instruments), provided that the Investment Adviser considers this to be in the best interests of the shareholders of the Portfolio. "Money Market Instruments" are instruments normally dealt with on the money markets which are liquid and have a value which can be accurately determined at any time.

Please refer to the offering document for details of environmental, social and governance considerations employed by the Investment Adviser in the investment process.

Use of derivatives / investment in derivatives

The Portfolio's net derivative exposure¹ may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. General Investment Risk

The value of assets in the Portfolio is typically dictated by a number of factors, including political, market and general economic conditions. The Portfolio's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Portfolio may suffer losses. There is no guarantee of the repayment of principal.

2. Currency Risk

Underlying investments of the Portfolio may be denominated in currencies other than the base currency of the Portfolio. Also, a class of shares may be designated in a currency other than the base currency of the Portfolio. The value of the assets of the Portfolio as measured in the Portfolio's base currency will be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls, independent of the performance of its securities investments.

3. Concentration Risk

The Portfolio's investments are concentrated in equity securities of Chinese companies. The value of the Portfolio may be more volatile than that of a portfolio having a more diverse portfolio of investments. The value of the Portfolio may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Chinese companies.

4. Risk associated with the PRC

Risks associated with investments in the PRC generally

The Portfolio's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments and repatriation of principal and profits) in the PRC, which are subject to change and such change may have potential retrospective effect.

Risks associated with ChiNext market and/or the Science and Technology Innovation Board ("STAR Board")

- Higher fluctuation on stock prices and liquidity risk: Listed companies on ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. Listed companies on ChiNext market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board.

- Over-valuation risk: Stocks listed on ChiNext market and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.

- Differences in regulation: The rules and regulations regarding companies listed on ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those in the main boards.

- Delisting risk: It may be more common and faster for companies listed on ChiNext market and/or STAR Board to delist. ChiNext market and STAR Board have stricter criteria for delisting compared to the main boards. This may have an adverse impact on the fund if the companies that it invests in are delisted.

- Concentration risk: STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the fund to higher concentration risk.

Investments in the ChiNext market and/or STAR Board may result in significant losses for the fund and its investor.

Risks associated with investment made through QFI Program

The Portfolio may suffer substantial losses if the approval of the QFI status is being revoked/terminated or otherwise invalidated as the Portfolio may be prohibited from trading of relevant securities and repatriation of the Portfolio's monies, or if any of the key operators or parties (including QFI custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

Risk associated with Stock Connect

The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect. Stock Connect is subject to quota limitations. Where a suspension in the trading through the programme is effected, the Portfolio's ability to invest in China A-Shares or access the PRC market through the programme will be adversely affected. In such event, the Portfolio's ability to achieve its investment objective could be negatively affected.

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

RMB currency and conversion risks

Chinese Renminbi (RMB) is currently traded in two markets: one in mainland China (onshore RMB, or CNY) and one outside mainland China (primarily in Hong Kong) (offshore RMB, or CNH). Although CNH and CNY are the same currency, they trade at different rates, and any divergence between CNH and CNY may adversely impact investors. CNY is currently not freely convertible and is subject to exchange controls and restrictions, whereas CNH is freely tradable.

Risk associated with PRC taxation

There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realised via QFI Program or Stock Connect or Access Products on the Portfolio's investments in the PRC (which may have retrospective effect). Any increased tax liabilities on the Portfolio may adversely affect the Portfolio's value. Based on professional and independent tax advice, the Portfolio will not make PRC tax provisions, subject to any changes in the PRC tax laws, regulations and practice.

5. Risks associated with equitiesEquity market risk

The Portfolio may invest in equity securities, and also directly or indirectly in equity-related securities and instruments such as preferred stock, convertible securities and warrants. The value of equity securities or equity-related securities and instruments is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

Risk associated with small-capitalisation / mid-capitalisation companies

The stock of small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

Risk associated with regulatory/exchanges requirements/policies of the equity market in emerging markets (including the PRC)

Securities exchanges in emerging markets (including the PRC) typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Portfolio.

6. Emerging markets risk

The Portfolio invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk, risks of nationalisation or expropriation of assets, and the likelihood of a high degree of volatility. High market volatility and potential settlement difficulties in the markets may also result in significant fluctuations in the prices of the securities traded on emerging markets and thereby may adversely affect the value of the Portfolio.

7. Risk associated with financial derivative instruments

Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. Financial derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. The leverage element/component of financial derivative instruments can result in a loss significantly greater than the amount invested in the financial derivative instruments by the Portfolio. Exposure to financial derivative instruments may lead to a high risk of significant loss by the Portfolio.

8. Sustainability risk

The Portfolio may be exposed to sustainability risks from time to time, where an environmental, social or governance event or condition could cause an actual or a potential material negative impact on the value of investments. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.

9. Risks associated with depositary receipts

Depositary receipts, such as ADRs, EDRs and GDRs, are generally instruments in the form of share certificates in a portfolio of shares held in the respective country of domicile of the issuer of the underlying shares. The value of Shares of the Portfolio which composed of such depositary receipts may not reflect the return a purchaser would realise if he or she actually owned the relevant shares underlying the depositary receipts and received the dividends paid on those shares because the price of the depositary receipts on any specified valuation dates may not take into consideration the value of dividends paid on the underlying shares.

10. Risks associated with Money Market Instruments

The Portfolio may also invest in Money Market Instruments for the purposes of cash management. The Portfolio may be prevented from achieving its objective during any period in which its assets are not substantially invested in accordance with its principal investment strategies as a result of being invested in such money market funds or instruments.

11. Custodian risk

Insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.

12. Operational risk

Material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.

13. Liquidity risk

The Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell at a price and time that the Investment Adviser deems appropriate, which could impact the Portfolio's ability to meet redemption requests on demand and may adversely impact the Portfolio's value as a result of a position being sold at a lower price than would have been achieved in normal market conditions.

14. Counterparty risk

A party that the Portfolio transacts with may fail to meet its obligations which could cause losses.

How has the fund performed?

The bar chart below shows the past performance of Class Base (Acc.) Shares and the past performance of the Reference Benchmark of the Portfolio. The Management Company has designated Class Base (Acc.) Shares as the representative share class, because this class is made available for retail investors internationally and is one of the longest running accumulation share classes of the Portfolio.

Past performance of the Portfolio and its Reference Benchmark

- **Portfolio launch date:** 26 August 2009
- **Class Base (Acc.) Shares launch date:** 26 August 2009
- **Reference Benchmark:** MSCI China All Shares Index (Total Return Net). Please note that the Portfolio is not designed to track its Reference Benchmark. Therefore the performance of the Portfolio and the Reference Benchmark may deviate. The Reference Benchmark of the Portfolio was changed in March 2021 to reflect a change in the investment policy. The current Reference Benchmark has been applied to the performance history of the Portfolio back to inception.
- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much Class Base (Acc.) Shares have increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fee and redemption fee you might have to pay.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio*:

Fee	What you pay
Subscription fee (Sales Charge)	Class Base (Acc.) Shares: up to 5.50% of the amount you buy
Switching fee	Class Base (Acc.) Shares: Nil** **Except where Shares are being exchanged for Shares which have a higher Sales Charge, the difference between the Sales Charges may be charged.
Redemption fee (Redemption Charge)	Class Base (Acc.) Shares: Nil

Contingent Deferred Sales Charge

Class Base (Acc.) Shares: Nil

* Any additional fees charged by intermediaries (authorized distributors) may still apply.

Ongoing fees payable by the fund

The following expenses will be paid out of the Portfolio. They affect you because they reduce the return you get on your investments.

Fee	Annual rate (as a % of the Portfolio's net asset value)
Management fee	Class Base (Acc.) Shares: 1.50%
Performance fee	Nil
Operating expenses (including depositary and administration fee)#	Class Base (Acc.) Shares: 0.40%*

* The figure is based on the expenses for the period from -1 December 2024 to 30 November 2025 and may vary from year to year. The figures are annualised.

In normal circumstances, the fees payable by the Portfolio to (i) the Management Company for its provision of risk management services, (ii) Depositary for its provision of depositary and administrative services and (iii) CACEIS Bank, Luxembourg Branch for its provision of registrar and transfer agency services, shall not exceed in aggregate 50 basis points of the Portfolio's total net assets. The Management Company may at its discretion impose a cap on a Share Class by Share Class basis on the amount of expenses that will be borne by the relevant Share Class. The Management Company or the Investment Adviser will bear any actual operating expenses that exceed any expense cap. Any such expense cap may be decreased, waived or eliminated at any time and without prior notice to investors in the Management Company's sole discretion. Shareholders should be aware that the existence of such a cap may increase the performance of the Share Class it has been applied to. Any increase or elimination of the cap in the future could have a negative impact on the performance of the Share Class it has previously been applied to. Investors may obtain further information regarding the expenses that were borne by the Management Company or the Investment Adviser for each Portfolio in the annual report of the Fund.

Other fees

You may have to pay other fees when dealing in the shares of the Portfolio.

Additional Information

You may generally buy and redeem shares at the Portfolio's next-determined net asset value after Goldman Sachs Asset Management (Hong Kong) Limited as the Hong Kong Representative of the Fund or an intermediary (authorized distributor) receives your request in good order not later than 5:00pm Hong Kong time (the Hong Kong Dealing Cut-off Point) or such other earlier dealing cut-off time as the intermediaries may impose.

The net asset value of the Portfolio is calculated on each business day and are available on the following website <https://am.gs.com/en-hk/individual> and <https://am.gs.com/zh-hk/individual>.

Investors may obtain the past performance information of other share classes offered to Hong Kong investors from the following website <https://am.gs.com/en-hk/individual> and <https://am.gs.com/zh-hk/individual>.

Hong Kong investors may obtain the information on the intermediaries upon request.

Information regarding risk management and control policy, procedures and methods employed by the Fund can be made available to Hong Kong investors upon request, except for any information which is considered to be sensitive or confidential in nature or any information which, if disclosed, would not be in the interest of investors of the Fund generally.
