Financial year end of this fund:	30 April		
Minimum investment:		<u>Initial Investment</u>	<u>Subsequent Investment</u>
	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is an Equity fund and aims to achieve capital growth over the long term.
- The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are listed, headquartered, or do most of their business in Japan.
- The Investment Manager considers environmental, social and governance (ESG) characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.
- The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. The Investment Manager will exclude investment in issuers with a Fidelity ESG Rating of 'C' or below.
- The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its Benchmark (as defined below), after excluding 20% of securities with the lowest ESG ratings.
- The Investment Manager supplements the study of financial results of potential investments with additional qualitative and quantitative non-financial analysis including sustainability risks and will factor them into investment decision making and risk monitoring to the extent they represent potential or actual material risks and/or opportunities to maximise long-term risk-adjusted returns:
 - "Qualitative assessments" will be by reference, but not limited, to case studies, environmental, social and governance impacts associated with issuers, product safety documents, customer reviews, company visits or data from proprietary models and local intelligence.
 - "Quantitative assessments" will be by reference to ESG ratings which may be an internal rating assigned by the Investment Manager primarily using Fidelity ESG Ratings or from external providers including but not limited to MSCI, relevant data in third-party certificates or labels, assessment reports on carbon footprints, or percentage of economic activities of issuers generated from ESG-relevant activities. Fidelity ESG Ratings are a proprietary ESG rating system developed by Fidelity's research analysts to assess individual issuers. The ratings score issuers on an A-E scale on sector-specific factors, which include relevant principal adverse impact indicators, and a trajectory forecast based on an assessment of expected change of an issuer's sustainability characteristics over time. The ratings are based on fundamental bottom-up research and assessment using criteria specific to the industry of each issuer relevant to material ESG issues. The Fidelity ESG ratings methodology takes into account environmental, social and governance factors. Environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.
- ESG ratings and associated ESG data are maintained on a research platform operated by the Investment Manager. The provision and sourcing of ESG data is reviewed on a regular basis to ensure its continuing suitability, adequacy and effectiveness for the ongoing assessment of sustainability risks.
- Fidelity considers the exclusion of issuers from the investment universe based on specific ESG criteria, and has established the following exclusion framework. The fund is subject to controversial weapons exclusions, which include, but are not limited to, biological, chemical, incendiary weapons, non-detectable fragments, blinding lasers, cluster munitions, landmines and nuclear weapons for non-signatories of the Treaty on the Non-Proliferation of Nuclear Weapons. The fund adheres to further exclusions such as tobacco production, thermal coal (subject to transition criteria), norms-based exclusions as well as exclusions relating to sovereign issuers on the Financial Action Task Force (FATF) blacklist. The fund applies further exclusions in addition to those mentioned above through additional negative screening. The additional negative screening includes issuers which have exposure, or ties, to: (i) controversial weapons (depleted uranium and nuclear weapons); (ii) production of conventional weapons (a weapon of warfare which is not nuclear, chemical or biological in nature); (iii) production and distribution of semi-automatic weapons intended for sale to civilians; (iv) tobacco-related activities; (v) thermal coal extraction and power generation subject to additional transition criteria; (vi) extraction of oil sands; (vii) extraction of arctic oil and gas; or (viii) sovereign exclusions in addition to those on the FATF blacklist. Negative screening of sovereign issuers is based on the Investment Manager's internal sovereign exclusion framework which concentrates on three principles relating to governance, respect for human rights and foreign policy. Sovereigns failing to meet the standards of the framework are identified based on a proprietary assessment. To support this assessment, the Investment Manager makes reference to international recognised indicators such as the FATF blacklist, the World Bank's Worldwide Governance Indicators and UN Security Council sanctions. In addition, the fund will apply Paris Aligned Benchmark exclusions. The Investment Manager may apply revenue thresholds for more refined screens and has the discretion to implement additional sustainable requirements and exclusions.
- Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.
- The fund may invest in securities of issuers with low but improving ESG characteristics. These issuers may be on an improving trajectory or demonstrate potential for improvement through the implementation and execution of a formal engagement plan.

- In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other financial measures, as well as company management, industry, economic conditions, and other factors.
- The Investment Manager will use the TOPIX Total Return Index (the “Benchmark”), a broad market index that does not take into account ESG characteristics for the purposes of investment selection, risk monitoring and performance comparison. The fund invests in securities of the Benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the Benchmark, and its performance over any period may or may not deviate significantly from that of the Benchmark.
- The fund may use derivatives for hedging, efficient portfolio management and investment purposes.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

Use of derivatives/investment in derivatives

The fund’s net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong offering documents for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Sustainable Investing

- To the extent the fund weighs ESG or sustainability criteria in choosing investments, it may underperform the market or other funds that invest in similar assets but do not apply sustainability criteria. Sustainable characteristics used in the fund’s investment policy may result in the fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might be disadvantaged to do so. As such, the application of ESG criteria may restrict the ability of the fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the fund.
- The ESG characteristics of securities may change over time, which may in some cases require the Investment Manager disposing of such securities when it might be disadvantageous to do so from a financial perspective only. This may lead to a fall in the value of the fund.
- The use of ESG criteria may also result in the fund being concentrated in companies with ESG focus and its value may be volatile when compared to other funds having a more diversified portfolio of investments.
- There is a lack of standardised taxonomy of ESG evaluation methodology and the way in which different ESG funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds.
- While the fund, in selecting investments, may use a proprietary ESG scoring process that is based partially on third party data, such data may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer.
- Evaluation of sustainable characteristics of the securities and selection of securities may involve the Investment Manager’s subjective judgment. As a result, there is a risk that the relevant sustainable characteristics may not be applied correctly or that the fund could have indirect exposure to issuers who do not meet the relevant sustainable characteristics, and sustainable characteristics of a security can change over time.
- In making its proxy voting decisions consistent with ESG criteria, exclusionary criteria, the fund may not always be consistent with maximising an issuer’s short-term performance.

Equities

- The fund’s investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Concentration Risk

- The fund's investments are concentrated in a single or small number of countries. The value of the fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- The value of the fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market of such country(ies).

Foreign Currency Risk

- The fund's assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund's net asset value.

Financial Derivative Instruments

- The fund's net derivative exposure may be up to 50% of its net asset value. The use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instrument by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2021 was achieved under circumstances that may no longer apply as the investment objective was changed in 2021.

* On 17 January 2022, Fidelity Funds - Japan Smaller Companies Fund merged into Fidelity Funds - Sustainable Japan Equity Fund, which was renamed as Fidelity Funds - Japan Equity ESG Fund with effect from 28 March 2025.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-JPY increased or decreased in value during the calendar year being shown. Performance data has been calculated in JPY including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 1990
- Class A-JPY launch date: 1990
- Class A-JPY is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund's reference currency.
- The Benchmark is the TOPIX Total Return Index.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A – Up to 5.25% of NAV Class Y – 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched into
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A – Up to 1.50% p.a. of NAV Class Y – Up to 0.80% p.a. of NAV
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong offering documents. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong offering documents.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time on a dealing day, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund (other than Class A) will be published in the South China Morning Post and the Hong Kong Economic Times. Net asset value of Class A will be published on www.fidelity.com.hk *.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk *.
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
- Additional information in relation to fund's ESG focus, methodologies and policies is available at <https://www.fidelity.lu/funds/factsheet/LU0048585144/tab-disclosure#SFDR-disclosure> * and <https://fidelityinternational.com/sustainable-investing-framework/> *.
