FOR THE ATTENTION OF HONG KONG INVESTORS

Issuer: Invesco Hong Kong Limited

30 April 2026

This statement provides you with key information about this product.

This statement is a part of the Hong Kong Offering Document.

You should not invest in this product based on this statement alone.

Quick Facts

Fund Manager/ Management Company:	Invesco Management S.A.	
Investment Manager(s):	Invesco Asset Management Limited, located in the UK. (Internal delegation)	
Investment Sub-Manager:	Invesco Advisers Inc., located in the USA. (Internal delegation)	
Base Currency:	Euro	
Custodian (Depositary):	The Bank of New York Mellon SA/NV, Luxembourg Branch	
Dealing Frequency:	Daily	
Financial Year End:	The last day of February	
Ongoing charges over a year:	Class A accumulation – EUR	0.38%*
	Class A annual distribution – EUR	0.38%*
	Class C accumulation – EUR	0.26%*

* The ongoing charges figure is calculated based on annualised expenses for the period ending 31 August 2025 divided by the average net assets over the same period, taking into account any discretionary cap on ongoing charges that has been imposed, the details of which are set out in the Supplement – Additional Information for Hong Kong Investors. The Management Company may from time to time apply a discretionary cap on ongoing charges. Such discretionary cap may be applied or removed at the absolute discretion of the Management Company in the best interest of investors, with a view to keeping the ongoing charges competitive. The cap may vary from year to year and any actual fees incurred which are above the capped level will be borne by the Management Company. The ongoing charges figure may also vary from year to year. It excludes portfolio transaction costs.

Dividend Policy: Net Income distribution (Dividends, if any, will be paid to investors)
Accumulation (Dividends, if any, will be re-invested into the Fund)

What is this product?

Invesco Euro Ultra-Short Term Debt Fund (the “Fund”) is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Invesco Euro Ultra-Short Term Debt Fund

Objectives and Investment Strategy

The Fund seeks to achieve a positive gross return through a conservative allocation (low duration and high credit quality) to rates and credit as more fully described below. Due to the prevailing interest rate environment or other factors, it is possible that this may not be achieved.

The Fund seeks to achieve its objective by investing in debt securities and money market instruments. Debt securities may include government debt securities, fixed and floating rate corporate debt securities and money market instruments.

The Fund will invest at least 70% of its net asset value in debt securities denominated in Euro.

The average portfolio duration will not exceed 18 months. Portfolio duration is a measure of the weighted average duration of the individual debt securities of the portfolio. For the purposes of the Fund, debt securities will not have a residual maturity exceeding 3.75 years at the time of purchase.

The Fund may invest in debt instruments with loss-absorption features ("LAP") (e.g., contingent convertible debt securities, senior non-preferred debts, etc.). These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's expected maximum investments in LAP will be up to 40% of its net asset value.

The Fund may invest up to 5% of its net asset value in non-investment grade debt securities (non-investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency) but will not invest in securities with a credit rating of below B- by Standard and Poor's rating agency, or equivalent (or in the case of unrated debt securities (i.e. debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch), determined to be of an equivalent rating).

The Fund may enter into financial derivative instruments for efficient portfolio management, hedging and not extensively for investment purposes. The Fund's use of derivatives may include active financial derivative positions on credit, interest rates and currencies which may be used to achieve both long and short positions, which overall will not result in the Fund being directionally short or short any asset class. In addition, the Fund will not have uncovered short positions, in line with appropriate UCITS regulatory requirements.

Non-Euro investments are intended to be hedged back into Euro on a discretionary basis.

For more information on the Fund's environmental, social, and governance (ESG) criteria, please refer to Appendix B of the Prospectus where the Fund's pre-contractual information pursuant to Article 8 of SFDR¹ is available.

The Fund will engage in securities lending, however, the proportion lent out at any time will be dependent on dynamics including, but not limited to, ensuring a reasonable rate of return for the lending Fund and borrowing demand in the market. As a result of such requirements, it is possible that no securities are lent out at certain times. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 29%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure² may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk** - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by

¹ Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

² Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

Invesco Euro Ultra-Short Term Debt Fund

fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

- **Credit risk**

- Investment in bonds, debt or other fixed income securities (including corporate and sovereign bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.
- Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub-Manager (if applicable) may not be able to dispose of the debt instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.

- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.

- **Liquidity risk** - The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests where some of the Fund's securities may become illiquid and the Fund may experience difficulties in selling securities at a fair price within a timely manner. This could impact the Fund's ability to meet redemption requests on demand.

- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

- **Risks associated with investments in debt instruments with loss-absorption features (LAP)**

- Debt instruments with loss-absorption features are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of a pre-defined trigger event(s) (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with LAP may also be exposed to liquidity, valuation and sector concentration risk.
- The Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.

The Fund may invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.

- **Risk of Eurozone crisis** - The Fund may have significant investment exposure to the Eurozone or the Euro. In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the Fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone or other adverse economic, political, policy, foreign exchange, tax, legal or regulatory event affecting the Eurozone markets, may have a negative impact on the value of the Fund.

- **Sovereign debt risk** - The Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.

Invesco Euro Ultra-Short Term Debt Fund

- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes and for investment purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund. As well as the risks identified above, the Fund may use derivatives for investment purposes and may be exposed to additional leveraged risk, which may result in significant fluctuations of the net asset value of the Fund and/or extreme losses where the Investment Manager is not successful in predicting market movements. This in turn may lead to an increase in the risk profile of the Fund.

How has the Fund performed?

• The performance shown in the chart above prior to 29 July 2020 was based on an investment objective and policy that no longer applies, with certain changes being made to the Fund on 29 July 2020.

- The Fund Manager views Class A accumulation - EUR (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 14 October 1999.
- Share Class launch date: 14 October 1999.
- The base currency of the Fund is EUR.
- Past performance of the Share Class is calculated in EUR.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay
