Dealing frequency:	Daily	Financial year end:	31 August
Base currency:	USD		
Dividend policy: (Class A, C and D as at the above date)	Non-Distributing Shares: No dividends will be declared or paid ▶ A2, C2, D2 Distributing Shares: Dividends, if declared will be paid in cash or reinvested ▶ Quarterly: A5(G), C5(G), D5(G) ▶ Monthly: A6, A8, A10 ▶ Yearly: A4(G), D4(G) All declared dividends result in an immediate decrease in the Fund's net asset values per share on ex-date, whether paid in cash or reinvested. All distributing share classes in this Fund pay dividends out of gross income while charging all or part of their fees and expenses to capital (i.e. payment of fees and expenses out of capital). This will result in an increase in distributable income available for payment as dividends, and therefore, these share classes may effectively pay dividends out of capital. Classes 6, 8 and 10 may also pay dividends out of capital (including net realised and net unrealised capital gains) of the relevant share class at the Directors' discretion. The Directors may amend the above dividend policy subject to the SFC's prior approval and by giving one month's prior notice to investors.		
Minimum investment:	US\$5,000 initial, US\$1,000 additional for Class A and C Shares US\$100,000 initial, US\$1,000 additional for Class D Shares		

What is this product?

Global Equity Income Fund (the "**Fund**") is a sub-fund of BlackRock Global Funds ("**BGF**"), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

To achieve an above average income without sacrificing long term capital growth by investing globally at least 70% of its total assets in stocks of companies based in, or with the majority of their business in, developed markets (such as Japan, United Kingdom and the United States).

The Fund may also invest in emerging markets (such as Brazil, South Africa and South Korea).

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as equity securities consistent with the Fund's objective and cash.

The Fund will invest in a manner consistent with the principles of environmental, social and governance ("**ESG**") investing and in accordance with the ESG policy described in the Prospectus.

The Fund's expected total maximum investment in debt instruments with loss-absorption features,

including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may use derivatives for hedging, efficient portfolio management and investment purposes. The Fund may employ currency management and hedging techniques which may include hedging the currency exposure on the Fund's portfolio and/or using more active currency management techniques such as currency overlays. Any active management techniques implemented by the Fund through the currency derivatives such as forward exchange contracts, currency futures and options may not be correlated with the primary underlying securities held by the Fund.

Use of Derivatives/Investment in Derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. Investment Risks

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity Risk

The values of equities fluctuate daily and a Fund investing in equities could incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including changes in investment sentiment, trends in economic growth, inflation and interest rates, issuer-specific factors, corporate earnings reports, demographic trends and catastrophic events.

3. Capital Growth Risks

Risks associated with Income-generating Investment Strategy

The Fund pursues an investment strategy in order to generate income which may reduce the potential for capital growth and future income of the Fund.

Risks associated with Fees and/or Dividends Paid Out of Capital

Any distributions involving payment of dividends out of capital (Classes 6, 8 and 10), payment of dividends out of gross income (i.e. payment of fees and expenses out of capital) (Classes 4(G), 5(G), 6, 8 and 10) or payment of implied interest rate differentials arising from share class currency hedging as dividends (Class 8) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Whilst all dividends paid result in an immediate reduction of the net asset value per share, these share classes may pay larger dividends (i.e. by paying dividends out of capital, gross income or interest rate differentials arising from share class currency hedging gains (if any)), which may therefore result in a larger reduction in the net asset value per share.

Payment of Dividends From Implied Interest Rate Differentials

For Distributing (R) Shares (Class 8), any dividends payable may include interest rate differentials arising from share class currency hedging gains/losses which may increase/decrease dividends paid. Shareholders of such Distributing (R) Shares will forego capital gains as any currency hedging gains are distributed rather than added to capital. Conversely, currency hedging losses may decrease the dividends paid, and in extreme cases may deduct from capital.

4. Currency Risks

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund's assets.

The Investment Adviser may utilise techniques and instruments (e.g. currency overlays) in relation to currencies other than the base currency with the aim of generating positive returns. Any active currency management techniques implemented by the Fund may not be correlated with the underlying securities held by the Fund. As a result, the Fund may suffer significant losses even if there is no loss to the value of the underlying securities held by the Fund.

5. Derivatives Risks

Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the derivative by the Fund. In an adverse situation, if the use of derivatives for hedging and efficient portfolio management becomes ineffective, the Fund may suffer significant losses.

6. Emerging Market Risks

Investment in emerging markets may be subject to a higher than average volatility than more developed markets due to greater political, tax, sustainability related, economic, social, and foreign exchange risks.

The size and trading volume of securities markets in emerging markets may be substantially smaller than developed markets. This may subject the Fund to higher liquidity and volatility risks.

Custody and registration of assets in emerging markets may be less reliable than in developed markets, which may subject the Fund to higher settlement risk.

The Fund may be subject to higher regulatory risks due to low level of regulation, enforcement of regulations and monitoring of investors' activities in emerging markets.

7. Foreign Investments Restrictions Risks

Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Fund.

8. Small/Mid Cap Companies Risks

Many small/mid cap company stocks trade less frequently and in smaller volume, and may be subject to more abrupt or erratic price movements than stocks of large companies. The securities of small/mid cap companies may also be more sensitive to market changes than the securities of large companies.

9. Currency Conversion Risk for Renminbi ("RMB") Denominated Classes

The Fund offers RMB denominated share classes. RMB is currently not freely convertible and is subject to exchange controls and restrictions.

Under exceptional circumstances, payment of realisation proceeds and/or dividend payment (if any) in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

RMB is traded in both the onshore and offshore markets. While both onshore RMB ("CNY") and offshore RMB ("CNH") represent the same currency, they are traded in different and separate markets which operate independently. The Management Company will apply the CNH rate for currency conversion of RMB denominated share classes. Any divergence between CNH and CNY may adversely impact investors.

10. Liquidity Risks

The size and trading volume of securities in the markets relevant to the Fund may be substantially smaller than developed markets. This may lead to investments in such securities becoming less liquid, making it difficult to dispose of them which may reduce the Fund's returns/lead to losses for investors.

How has the fund performed?

Historic performance to 31 December 2025

Notes:

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website www.blackrock.com/hk for performance information regarding other share classes. This website has not been reviewed by the SFC.

† The benchmark of the Fund is MSCI All Country World Index.
