A sub-fund of Invesco Funds (SICAV)

FOR THE ATTENTION OF HONG KONG INVESTORS

Issuer: Invesco Hong Kong Limited

30 April 2026

*This statement provides you with key information about this product.
This statement is a part of the Hong Kong Offering Document.
You should not invest in this product based on this statement alone.*

Quick Facts

Fund Manager/ Management Company:	Invesco Management S.A.
Investment Manager(s):	Invesco Management S.A., Zweigniederlassung Deutschland, located in Germany. (Internal delegation)
Investment Sub-Manager(s):	Invesco Advisers, Inc., located in the USA (Internal delegation) Invesco Asset Management Limited, located in the UK. (Internal delegation)
Base Currency:	Euro
Custodian (Depository):	The Bank of New York Mellon SA/NV, Luxembourg Branch
Dealing Frequency:	Daily
Financial Year End:	The last day of February
Ongoing charges over a year:	Class A (USD hedged) accumulation – USD 1.17%* Class A accumulation – EUR 1.17%* Class C (USD hedged) accumulation – USD 0.77%* Class C accumulation – EUR 0.77%*

* The ongoing charges figure is calculated based on annualised expenses for the period ending 31 August 2025 divided by the average net assets over the same period, taking into account any discretionary cap on ongoing charges that has been imposed, the details of which are set out in the Supplement – Additional Information for Hong Kong Investors. The Management Company may from time to time apply a discretionary cap on ongoing charges. Such discretionary cap may be applied or removed at the absolute discretion of the Management Company in the best interest of investors, with a view to keeping the ongoing charges competitive. The cap may vary from year to year and any actual fees incurred which are above the capped level will be borne by the Management Company. The ongoing charges figure may also vary from year to year. It excludes portfolio transaction costs.

Dividend Policy: Accumulation (Dividends, if any, will be re-invested into the Fund)

What is this product?

Invesco Sustainable Allocation Fund (the “Fund”) is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The Fund aims to achieve a positive total return over a market cycle¹.

The Fund seeks to achieve its objective by gaining exposure primarily (at least 70% of its net asset value) to a flexible allocation of equities and debt securities globally which meet the Fund's environmental, social and governance (ESG) criteria with a particular focus on environmental issues.

The Fund's ESG criteria will be based on a set of screening thresholds (as outlined below and more fully described in the Fund's sustainability-related disclosures) determined by the Investment Manager from time to time. These criteria will be reviewed and applied on an ongoing basis and integrated as part of the quantitative investment process for stock and bond selection as well as portfolio construction.

Screening will also be employed to exclude securities issued by issuers which derive or generate a pre-determined level (as more fully described in the Fund's sustainability-related disclosures) of revenue or turnover from activities such as (but not limited to) fossil fuel industries, activities related to coal or nuclear power, extraction of tar sands and oil shale, fracking or arctic drilling activities, production of restricted chemicals, activities endangering biodiversity, activities generating pollution, manufacturing or sale of conventional weapons or production and distribution of tobacco. All issuers considered for investment will be screened for compliance with, and excluded if they do not meet, UN Global Compact principles. The current exclusion criteria may be updated from time to time.

The Investment Manager will employ a structured and clearly defined investment process and risk overlay, intended to reduce downward risks and volatility.

Within the equity allocation the Investment Manager applies a quantitative approach to evaluate the relative attractiveness of each stock. The portfolio is constructed using an optimisation process that takes into account the calculated expected returns of each stock as well as risk control parameters. The fixed income allocation seeks to generate returns by investing in a diversified portfolio of debt securities, with active management of duration.

The Investment Manager will use positive screening based on an integrated-best-in-class approach to identify companies, which in the view of the Investment Manager meet sufficient practice and standards in terms of their ESG profile for inclusion in the Fund's universe, as measured by their ratings relative to their peers using a third party score (as more fully described in the Fund's sustainability-related disclosures). In order to determine the positive screening, issuers are compared to their peers within the same sector. Issuers with weaker ratings compared to their peer group are excluded.

The Fund's exposure to debt securities will include government debt. With regards to the ESG screening for government bonds, the Fund uses a variety of indicators to attain the social and environmental characteristics. This includes exclusions based on military spending, energy mix etc as well as assessment with a best-in-class approach on a number of ESG criteria (using indicators from the area of political and social issues, as well as environmental issues, including but not limited to Fundamental Rights and Principles at work conventions, International Human Rights treaties, Paris Agreement, UN Conservation on Biological Diversity, military expenditure and corruption) to determine an overall rating on sovereign issuers for inclusion in the portfolio.

It is expected that the size of the investment universe of the Fund (including both equities and debt securities, whether taken together or considered separately) will be reduced by about 30% to 50% in terms of number of issuers after the application of the above ESG screening.

Up to 30% of the net asset value of the Fund may be invested in money market instruments and other transferable securities, which will also meet the Fund's criteria on sustainability.

For more information on the Fund's ESG criteria, please refer to Appendix B of the Prospectus where the Fund's pre-contractual information pursuant to Article 8 of SFDR² is available.

Depending on market conditions and as part of the risk overlay, the Fund may at times be positioned defensively with more than 30% of the net asset value in money market instruments and other transferable securities, which would be expected to have a low correlation to traditional debt and equity indices.

Non-Euro denominated investments may be hedged back into Euro at the discretion of the Investment Manager.

¹ The term "market cycle" refers to a period that would include both a decrease and a meaningful slow down, as well as a growth phase.

² Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

The Fund may enter into financial derivative instruments for efficient portfolio management, hedging and not extensively for investment purposes. The Fund's use of derivatives may include derivatives on credit, rates, equities and currencies and may be used to achieve both long and short positions, which overall will not result in the Fund being directionally short or short any asset class. Such derivatives may include (but are not limited to) credit default swaps, total return swaps, interest rate swaps, currency forwards, futures and options. In addition, the Fund will not have uncovered short positions, in line with appropriate UCITS regulatory requirements.

The expected proportion of the net asset value of the Fund subject to total return swaps is 0%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to total return swaps is 25%.

The financial derivative instruments used for purposes other than hedging will also meet the Fund's ESG criteria.

The Fund will engage in securities lending, however, the proportion lent out at any time will be dependent on dynamics including, but not limited to, ensuring a reasonable rate of return for the lending Fund and borrowing demand in the market. As a result of such requirements, it is possible that no securities are lent out at certain times. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 50%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure³ may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **ESG investment risk**
 - Currently, there is no universally accepted framework or list of factors to consider to ensure that investments are compliant with ESG criteria. The lack of common standards may result in different approaches to setting and achieving ESG objectives.
 - ESG factors may vary depending on investment themes, asset classes, investment philosophy and subjective use of different ESG indicators governing portfolio construction. The selection and weightings applied may to a certain extent be subjective or based on metrics that may share the same name but have different underlying meanings. ESG information, whether from an external and/or internal source, is, by nature and in many instances, based on a qualitative and judgemental assessment, especially in the absence of well-defined market standards and due to the existence of multiple approaches to ESG criteria. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. It may consequently be difficult to compare strategies integrating ESG criteria. The subjective value which investors may or may not assign to certain types of ESG criteria may differ substantially from that of the Fund.
 - The lack of harmonised definitions may also potentially result in certain investments not benefitting from preferential tax treatments or credits because ESG criteria are assessed differently than initially thought.
 - Applying ESG criteria to the investment process may exclude securities of certain issuers for non-financial reasons and, therefore, may forgo some market opportunities available to funds that do not use ESG or sustainability criteria.
 - The securities held by a Fund may be subject to style drift which no longer meet the Fund's ESG criteria after its investments. The Investment Manager may need to dispose of such securities when it might be disadvantageous to do so. This may lead to a fall in the value of the Fund.

³ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

Invesco Sustainable Allocation Fund

- The use of ESG criteria may also result in the Fund being concentrated in companies with ESG focus and its value may be more volatile than that of a fund having a more diverse portfolio of investments.
- ESG information from third-party data providers (such as Moody's ESG Solutions Business involvement data, MSCI ESG Research or ISS Climate Solution) may be incomplete, inaccurate or unavailable. As a result, there exists a risk of incorrectly assessing a security or issuer, resulting in the incorrect inclusion or exclusion of a security. ESG data providers are private undertakings providing ESG data for a variety of issuers. The ESG data providers may change the evaluation of issuers or instruments, at their discretion and from time to time, due to ESG or other factors.
- **Dynamic Asset Allocation Risk** - The Investment Manager has wide discretion to allocate dynamically within an asset class or between different asset classes. The allocation of investments between different asset classes or between segments of the same asset class may have a significant effect on the Fund's performance. The Fund could miss attractive investment opportunities by having underweight exposure in markets that subsequently experience significant returns and could lose value by being overweight in markets that subsequently experience significant declines. As a result, the relevance of the risks associated with investing in each asset class (or segment of the same asset class) will fluctuate over time. This may result in possible substantial and sudden changes to the Fund's risk profile. In addition, the periodic allocation or rebalancing of investments may incur greater transaction costs than a fund with static allocation strategy.
- **Currency exchange risk**
 - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
 - For the hedged share class, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or the currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.
- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Equities risk** - The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.
- **Credit risk**
 - Investment in bonds, debt or other fixed income securities (including corporate and sovereign bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.
 - Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub-Manager (if applicable) may not be able to dispose of the debt

Invesco Sustainable Allocation Fund

instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.

- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.
- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Sovereign debt risk** - The Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.
- **Risks relating to securities lending transactions** - Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out. The Fund is also exposed to counterparty risk from the lending agent.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes and for investment purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund. As well as the risks identified above, the Fund may use derivatives for investment purposes and may be exposed to additional leveraged risk, which may result in significant fluctuations of the net asset value of the Fund and/or extreme losses where the Investment Manager is not successful in predicting market movements. This in turn may lead to an increase in the risk profile of the Fund.

How has the Fund performed?

- The Fund Manager views Class A accumulation - EUR (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 12 December 2017.
- Share Class launch date: 12 December 2017.
- The base currency of the Fund is EUR.
- Past performance of the Share Class is calculated in EUR.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay
Subscription fee/ Initial charge	Class A: Not exceeding 5.00% of the gross investment amount. Class C: Not exceeding 5.00% of the gross investment amount.
Switching fee	Up to 1.00% of the value of the shares being switched.
Redemption fee	N/A

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the Fund's value)

Custodian fee/ Depository charge	Up to 0.0075%
Performance fee	N/A
Administration fee	N/A
Distribution fee	Class A: N/A Class C: N/A
Service agents fee	Class A: Up to 0.20% Class C: Up to 0.15%

* The fees can be increased subject to the prior approval of the Securities and Futures Commission ("SFC") and by giving not less than three months' prior notice to the investors.

Other fees

You may have to pay other fees when dealing in the shares of the Fund.

Additional Information

- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" (as defined in the Prospectus) and the price of shares is published each "Hong Kong business day" (as defined in the "Supplement - Additional Information for Hong Kong Investors") at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com/hk. This website has not been reviewed by the SFC.
